Exhibit V

Block'tivity

The real value of Blockchains

ne way to consider a blockchain project is through its market cap. Another way, closer to the real value, is observing the activity on the blockchain. Lots of FUD and HYPE are responsible for "misplaced" capital in the cryptocurrency space. Here, we are observing which project is actually being used by people, which is in our opinion, the best predictive indicator of value you can have.

Blockchain Activity Matrix

Let's discover the other face of the Blockchain !

[>>> More about Transactions Vs Operations](#)

#		Name	Activity			Value	Index	
			Activity	**Average** (7d)	**Record**	**Market Cap**	**AVI**	**CUI**
